

Insulators for your studio monitor speakers

Bottom sheet provides surely insulators stacking.

Stacking insulator

Set of 8

An experienced mixing engineer inspired us special stacking insulators.

MSIP enable to adjust speaker height to your ear level to listen the true sound.

Authentic standard appearance, special features and practical design allow you to fine-tune the sound image of the monitor you need.

■Feature

- Made of cast iron, the same as automotive brake disc that require vibration damping.
- Simultaneous realization of sound quality tuning and monitor height adjustment.
40mm diameter for excellent stability when stacked
- Including grip sheet provides preventing speakers from tipping over.
- Coated in the same process as the automobile parts. NO logo, the simplest practical finish.
- It's useful for more than just speakers, such as amplifiers and audio interfaces.

Imagine your set up.
