

Announcement for price increase of TAOC Products

Thank you for your continued patronage of TAOC products.

The external environment for TAOC's production in Japan continues to deteriorate, including soaring raw material costs, manufacturing , logistics costs and the impact of exchange rates due to social unrest.

We have continued to reduce costs by improving purchase wood and steel materials necessary for manufacturing TAOC products and KAIZEN production operations with striving to provide a stable supply of products.

However current prices ended up being unable to absorb the impact.

We deeply apologize for the inconvenience and appreciate your understanding and cooperation in this issue.

For more information, the timing of the change and the rate of increase,
please contact dealer or distributor.
